

李佳麒 Jack Li Sunday, March 07, 2010

概要

- 问题描述
- 基本概念
- •特性
 - 架构图
 - 存储方式
 - 支持数据类型
 - 命令集
 - 其他特性
 - Road map
- •测试
- 目前还处于玩具级阶段

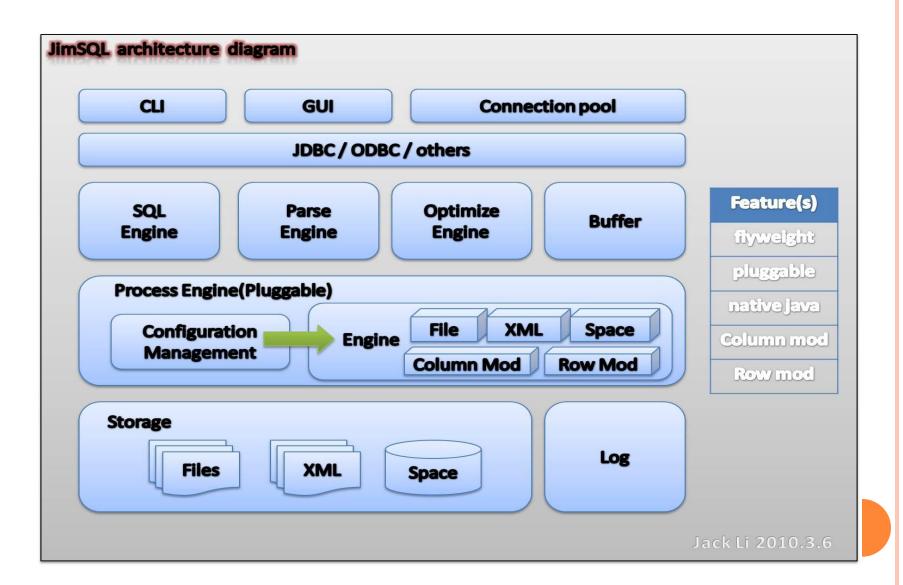

问题描述

- 来源:POJ (北大ACM月赛) 3699并予以扩充
 - http://acm.pku.edu.cn/JudgeOnline/problem?id=3699
- o 输入(Input)
- o 输出(Output)

基本概念

- RDBMS(Relational Database Management System)
- DML(Data Manipulation Language)
- DDL(Data Definition Language)
- Syntax Analysis
- Regular Expression

架构图

存储方式(目前文本存储,没实现索引)

存储目录结构

private File databasefile;//数据库目录 private File storge; //存储引擎目录 private File currenttable; //当前表文件 private static Connection connection;//连接

```
//单例模式保存数据库连接
public static Connection getInstance() throws
InstantiationException, IllegalAccessException,
ClassNotFoundException{
if(connection=null){
    connection = new Connection();
}
return connection;
}
```

支持数据类型

- o net.fly78.miniSQL.datatype.DataType接口
 - INT
 - STR
 - DATE
 - FLOAT
- o public interface DataType {
 - public String getStringValue();
 - public int getLength();
 - public Class<?> getType();
 - public DataType getValue();
 - public int compare(String r);

命令集(模拟MYSQL命令行风格)

- o use \$db
- o create database \$name
- show database
- show tables
- create table \$name (\$filed \$type \$length , \$filed \$type \$length)
- o select * from \$table where \$field=\$cond
- describe \$table;
- insert into \$table value(\$value);

命令集(续)

- o 接口Command
- Command适配器CommandAdpter
- 实现命令多态
- 通过正则表达式,反射
- o try{
- o Command rc =
 Ref2Class.getCommand(res.toLowerCase().split("
 ")[0]);
- res = res.substring(0, res.length()-1);
- o rc.excuse(res);
- o }catch(Exception e){
- System.out.println("unknow command");
- }

其他特性

- o 纯JAVA实现
- 开放架构
 - 支持配置解析器引擎方式
 - 支持配置存储引擎
- ○扩展基本数据类型
- 支持日志

Road map

- 改进存储方式
- 增加列存模式
- SQL标准的支持
- 语法解释器优化
- 增加索引
- •增加锁

测试用例

- 4 10
- o SID INT 8
- NAME STR 20
- SEX STR 2
- o AGE INT 8
- o 1000 Potion F 22
- o 1001 Phoenix_Down M 34
- o 1002 Remedy M 52
- 1003 Dagger F 31
- 1004 Rod M 42
- 1005 Flame_Staff M 72
- o 1006 Broad_Sword F 47
- 1007 Fork M 10
- o 1008 Javelin M 85
- 1009 Cats_Claws F 37
- o 1010 Dafei M 25
- o 1011 <u>Maliwen M 25</u>

测试用例

java –jar jim.jar

show database;

use db1;

show tables;

describe info;

select * from info;

Select * from info where sid>1008

```
C:\WINDOWS\system32\cmd.exe - java -jar jim.jar
C:∖jim>java -jar jim.jar
Wellcome to use jimSQL command line!
author : Jack Li
email : dafei1288@gmail.com
jimSQL>show database;
database
( time: 0.00 sec)
jimSQL>use db1;
database changed
jimSQL>show tablse;
runtime error please retry
jimSQL>show tables;
info
salary
( time: 0.00 sec)
jimSQL>describe info;
SID INT 8
 AME STR 20
SEX STR 2
 GE INT 8
 time: 0.00 sec)
 imSQL>select * from info;
 sid! name
                | sex! age
  1000: Potion | F: 22
  1001 | Phoenix_Down | M: 34
  1002 | Remedy
 1003 | Dagger
 1004! Rod
  1005 | Flame_Staff | M: 72
  1006 | Broad_Sword | F: 47
 1007! Fork
  1008! Javelin ! M: 85
  1009 | Cats_Claws | F | 37
  1010: Dafei : M: 25
  1011: Maliwen : M: 25
12 rows in set( time: 0.02 sec)
 imSQL>select sid, name, age from info where sid>1008;
 sid! name
                | age
 1009 | Cats_Claws | 37
 1010: Dafei : 25
1011: Maliwen : 25
3 rows in set( time: 0.00 sec)
```

测试用例

insert into info values (1012 JackLi M 26);

SQL语句还不完全支持标准

```
cv C:\VINDOVS\system32\cmd.exe - java -jar jim.jar
jimSQL>show tablse;
runtime error please retry
jimSQL>show tables;
salary
 time: 0.00 sec>
jimSQL>describe info;
SID INT 8
 MAME STR 20
SEX STR 2
 GE INT 8
 time: 0.00 sec)
 imSQL>select * from info;
 sid! name
                | sex! age
 1000: Potion | F: 22
  1001 | Phoenix_Down | M: 34
 1002; Remedy | M: 52
 1003 | Dagger
1004 | Rod
                  | F| 31
 1005; Flame_Staff; M: 72
1006; Broad_Sword; F: 47
 1007: Fork : M: 10
1008: Javelin : M: 85
  1009 | Cats_Claws | F! 37
 1010: Dafei | M: 25
1011: Maliwen | M: 25
12 rows in set( time: 0.02 sec)
jimSQL>select sid.name.age from info where sid>1008;
 sid! name
 1009 | Cats_Claws | 37
 1010: Dafei : 25
1011: Maliwen : 25
 rows in set( time: 0.00 sec)
jimSQL>insert into info values ( 1014 , JackLi , M , 26);
 1 record insert , time: 0.00 sec)
jimSQL>select sid,name,age from info where sid>1008;
sid! name
 1009 | Cats_Claws | 37
 1010: Dafei : 25
1011: Maliwen : 25
 rows in set( time: 0.00 sec)
jimSQL>insert into info values ( 1014 JackLi M 26 );
 1 record insert , time: 0.00 sec)
 imSQL>select sid,name,age from info where sid>1008;
 sid! name
 1009 | Cats_Claws | 37
 1010: Dafei | 25
 1011 | Maliwen
  1014: JackLi
 rows in set( time: 0.02 sec)
jimSQL>_
```

谢谢
